

Netflix Movies & TV Shows - EDA Assignment

Problem Statement:

Netflix has become one of the world's largest entertainment platforms, offering thousands of movies and TV shows. Understanding its content trends can help producers, marketers, and strategists make data-driven decisions. In this assignment, students will perform Exploratory Data Analysis (EDA) on Netflix's titles dataset to uncover trends related to genres, countries, release years, and content ratings.

EDA Questions:

1. How many total movies vs TV shows are in the dataset?
2. Which is the top 10 countries producing Netflix content?
3. What is the most common genre on Netflix?
4. Which years saw the highest number of releases?
5. What is the distribution of content ratings (G, PG, PG-13, TV-MA, etc.)?
6. Which directors have the most titles on Netflix?

Visualization Questions:

1. Bar chart showing Movies vs TV Shows count.
2. Horizontal bar chart of Top 10 countries by content count.
3. Pie chart showing content type distribution by rating.
4. Line plot showing number of releases per year.
5. Heatmap showing country vs genre frequency.
